DETAILED ACTION

Response to Amendment

1. Applicant's arguments filed 4/2/04, claim 30 has been fully considered but they are not persuasive.

In response applicant argument page 2, applicants argue that "channel load is not clearly defined in Meidan but appears to represent the load of a sector of a cell sit of a communication channel in a radio communication system... It is clear that adjusting a beam width for distributing a channel load, in Meidan, is not the same as adjusting a beam width based on received radio resource allocation instructions of the present invention ". In light of applicant's specification page 13, lines 10-17, applicant describes "radio resources may include amount of power, beam width, duration, etc..for each beam. The examiner, disagrees. Median defines channel load as communication (radio) resources in term of power limited and band-limited (see col.1 lines 39-54, col.6 lines 6-44); therefore, "channel load" is in one of categories of "radio resources".

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory

Art Unit: 2684

action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Allowable Subject Matter

3. Claims 31-32, 34, 36-38, objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding dependent claims 31-32, it is allowed for the reasons as stated in applicant's argument pages 3-4.

Regarding dependent claims 34 and 36, none of prior art teaching "at least one antenna is part of a wireless communication system and the beam width of the at least one antenna of a reverse link of the communication system is modified" as cited in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 30, 33 and 35, are rejected under 35 U.S.C. 102(b) as being anticipated by Meidan (US Patent 5,276,907).

Art Unit: 2684

Regarding to claim 30, Meidan discloses a method of communicating comprising the step of:

modifying at least one antenna's beam width (see col.6 lines 26-30) based on received radio resource allocation instructions for signals to be transmitted and/or receive by the at least one antenna (see col.6 lines 21-45).

Regarding claims 33 and 35, Median discloses communication system and the beam width of the at least one antenna of a forward link of the communication is modified (col.7 lines 19-25).

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu Nguyen whose telephone number is (703) 305-3427. The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 5:00 p.m.
